

Supplementary Figure 2

a

b

Supplementary Figure S2.

a. Scatter column plot of COVID-19 cases showing age (years) of the subgroups who survived versus those who died (n=567). Horizontal bars represent median value. Mann Whitney statistic presented.

b. Scatterplot of COVID-19 cases showing age versus %HScore. Linear regression (dark line) with 95% confidence limits (dotted lines), with Spearman's correlation coefficient (r) and p statistic presented.
